

The Michael Andrew Photography School
Homework: Intermediate- SLR's vs Point and Shoots

Name: _____ Email: _____
Date: _____

What is the biggest advantage of an SLR camera?

For this assignment you will need an SLR camera and a few different lenses, preferably a zoom, wide angle and normal lens. It may be best to go to a camera store and ask a sales person for a demonstration.

This will be best to do in large open space, such as a park, or photography showroom.

Stand in a fixed location, and choose a far away subject.

Change the lenses on the SLR camera and look at your subject. Be sure to adjust the zoom rings on the lenses to see the full range of the lens.

How does your viewing angle change from lens to lens?

When would you want a wide angle lens?

When would you want to use a telephoto zoom lens?
