Homework: Intermediate- Shutter Speed Quiz

Name: \_\_\_\_\_ Email: \_\_\_\_\_

Date: \_\_\_\_\_

Arrange the following shutter speeds from fast (left) to slow (right)

$1/60$ ,  $1/100$ ,  $1/15$ ,  $1''$ ,  $1/250$ ,  $1/500$ ,  $1/1000$ ,  $5''$

If the aperture is the same for all shutter speeds, which will allow the most light to enter the camera?

Which shutter speed would most likely properly expose a dark scene at night?

Which shutter speed would most likely properly capture a moving athlete?

Which shutter speed would require the greatest amount of light to enter through the lens to expose properly?

Which Shutter Speeds will most likely be blurry if you are taking a picture of a moving person?
